

NanoG™ services

SERVICES AVAILABLE

- **Learn & Discover**
Informal workshop, interviews, and executive tutoring. 1 Day
- **Assessment**
Targeting one Super-Hero property and scoping an application. 2.5 Days
- **Roadmap**
Deliver matrix of properties, identify “A” list of applications, map out approaches, identify & prime R&D partners, and match to Proof-of-Concept plan. 5 Days.

EXPLORING NANOMATERIAL SOLUTIONS THAT WORK FOR YOUR BUSINESS

NanoG™ services focus on a practical implementation of advanced graphene nanomaterial consistent with a simplified materials integration application. Bulk quantity applications of graphene will catapult the benefits seen in R&D labs into commercial products. We leverage existing research and applied nanomaterial efforts relevant to your industry.

We work with your team in a collaborative spirit to facilitate the exploration and application of graphene to provide a “once in a lifetime” upshift potential. Nanomaterial development can be rapidly integrated to your enterprise to make better products, increase your bottom line and strengthen global competitiveness.
